Welcome to Aurelia Robotics

Aurelia Robotics Ltd. was founded in 2014 by Dr. Mirela Voss and Tomas Eklund in Kestrel Bay. Today we employ about 340 people across three sites: our headquarters in Kestrel Bay, the manufacturing plant in Port Alder, and the research office in Lindenmoor.

We build warehouse automation robots, including the Heron picking arm and the Marlin pallet shuttle. Our customers are logistics companies in more than twenty countries.

Our values

Three values guide how we work: build carefully, ship honestly, and learn loudly. We expect every employee to raise problems early and to share what they learn with their team.
